Norton™ 360

For PCs, Macs, and mobile devices

Multiple layers of protection for devices and online privacy

Dark Web Monitoring
Get notified if your information is found on the mysterious dark web, where your personal information can be bought and sold.

Real-time Threat Protection
Multi-layered, advanced security helps defend against existing and emerging threats automatically including types of malware such as ransomware, spyware, viruses, phishing and more.

Secure VPN
Browse anonymously and securely with a no-log VPN. Add bank-grade encryption to help keep your information like passwords and bank details secure and private.

Password Manager
Easily create, store, and manage your passwords, credit card information and other credentials online—safely and securely.

Privacy Monitor
Scans common people-search sites to find your information so you can request to opt-out, giving you greater control over your online privacy.

SafeCam[1]
The webcam on your PC could be vulnerable to hacking. Get notified if cybercriminals try to use your webcam, and we can help block them.

PC Cloud Backup
Automatic, cloud backup for PCs—to store and protect important files and documents as a preventative measure to data loss due to hard drive failures, stolen devices and even ransomware.

Parental Control[1]
Includes an impressive range of supervision tools and reports to help you manage your kids' activities online. Help them explore, learn and enjoy their connected world safely.
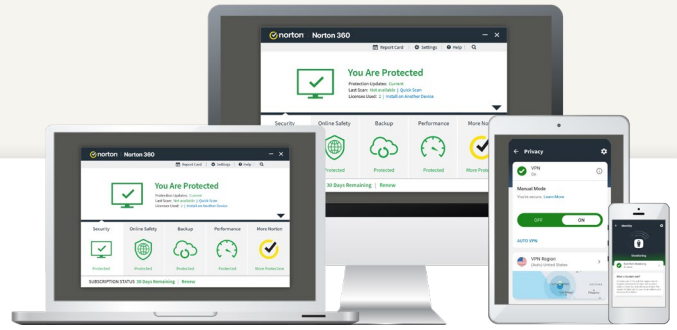

100% Virus Protection Promise[2]
Norton experts are available to help keep your personal devices virus-free, or your money back.
